OBJECTIVE

Final-year B.Tech (CSE – AI & ML) student at VNR VJIET with a 9.56 CGPA, seeking the Software Development Intern role at ScaleNova. Proficient in JavaScript/TypeScript, Python, and SQL, with hands-on experience building React.js frontends, tested REST API endpoints, and PostgreSQL-backed services, and writing automated tests in Agile, Git-based team workflows. Curious, persistent problem-solver eager to learn from senior engineers and ship production code.

EDUCATION

B.Tech in Computer Science Engineering (AI & ML) *2023 – 2027*
VNR Vignana Jyothi Institute of Engineering & Technology, Hyderabad | CGPA: 9.56 / 10 | Expected Graduation: May 2027

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, SQL, Java, C++

Frontend & Backend: React.js, responsive UI, Node.js, FastAPI, REST APIs, Microservices, async processing, Postman, browser DevTools

Databases: PostgreSQL, MySQL, MongoDB, Redis (basics), query design, Vector DBs (FAISS, ChromaDB)

Testing & Version Control: Pytest, Playwright, Selenium, automated unit & integration testing, Git, GitHub, CI/CD pipeline integration (Azure DevOps), structured logging, debugging

Cloud & DevOps: Docker, GCP (Cloud Run, App Engine, Pub/Sub), Azure DevOps, AWS (basics), Grafana (basics)

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Distributed Systems

Applied AI: LLM/RAG pipelines (LangChain, LangGraph), prompt engineering, OpenCV, YOLO

EXPERIENCE

AI Intern — ZF India Private Limited (R&D and Product Engineering) *Jun 2026 – Sep 2026*

- Automated manual QA workflows by building automated test scripts and AI-driven testing proof-of-concepts, integrated into Azure DevOps CI/CD pipelines within an Agile team for continuous validation of every code change.
- Engineered a production LLM + RAG test-script generation system for marine propulsion control software, owning the full ingestion-to-generation pipeline end to end rather than consuming a hosted API.
- Developed AI models to review existing automated test scripts for quality, coverage, and reliability, grounding results in a real ingested knowledge base of marine propulsion test-case data.
- Packaged the complete system as a deployable application with a fully ingested domain knowledge base as the final production artifact.

PROJECTS

Fake Complaint Detection & Geo-Analytics Platform *2026*
Python · FastAPI · PostgreSQL · React.js · Docker · NLP · HDBSCAN

- Built a full-stack, containerized application with a React frontend, FastAPI REST endpoints, and a PostgreSQL database, using async processing and collaborating across the stack to gather requirements and ship an end-to-end feature.
- Engineered a five-signal anomaly-detection algorithm (user velocity, cosine similarity, spatial clustering) achieving an 89.5% F1-score, with role-based dashboards for stakeholders.

IntelliQuery — Context-Aware Retrieval Pipeline with RAG *2025*
Python · LangChain · LangGraph · FAISS · FastAPI · Docker · GCP Cloud Run

- Designed a document-ingestion pipeline (chunking, embedding, FAISS indexing) and a query-routing state machine to autonomously retrieve and validate context across multi-turn sessions.
- Deployed as a Dockerized FastAPI service on GCP Cloud Run with structured logging and latency monitoring, gaining hands-on experience with reliability, observability, and performance at scale.

Intellivision — Real-Time Object Localisation & Depth Understanding *2025*
Python · YOLO · MiDaS · OpenCV · NumPy · Deep Learning · Computer Vision

- Built a real-time computer vision pipeline combining YOLO-based object detection and MiDaS monocular depth estimation to process images, video, and live camera feeds.
- Applied accuracy–latency trade-off engineering — frame sampling and selective object processing — achieving 96.2% mAP at 12–18 FPS real-time inference.

ACHIEVEMENTS & ACTIVITIES

- Solved 300+ problems on LeetCode across arrays, DP, graphs, and system-design fundamentals; ranked Top 100 Coders of college.
- 2nd place, Krithoathon National-Level Hackathon (100+ teams); 1st prize, Katalyst Inter-College Tech Fest.
- Recipient of Cadence, HDFC, and Katalyst Scholarships for sustained academic excellence (CGPA 9.56/10).
- Design Head, Katalyst / CSI Student Chapter; Event Organizer, Navigator Induction Event 2025.
